

RETRACTA-CADE®
BY VISIONTRON CORP

DISCOVER THE FIRST QUICK DEPLOYMENT BARRICADE

DEPLOYS IN UNDER 30 SECONDS

CROWD & TRAFFIC CONTROL

ENHANCED RESPONDER SAFETY

Heavy-duty but transportable: at 37 lbs. it's light enough for one person to carry, but substantial enough for a safe, controlled barrier system.

Safety On Demand: The fully retractable, portable barricade system

Extremely durable HDPE extensions: pull out in seconds with the attached carabiner. Grooved stripes won't wear or fade over time.

Legs deploy easily: with a simple hand lever and lock into place.

Rust-proof anodized aluminum and impact-resistant plastics: designed to withstand heavy use and the outdoor elements.

Optional silk-screen printing: on the unit face for a permanent message.

Adjustable length:
from 4' - 10'.

Stackable and Storable

Store large quantities efficiently: at fire houses, police stations, etc. for immediate access. 16 units store in a 4' x 4' x 4' area.

Lockable Connection

Threaded carabiner: locks to secure the connection between barriers, and rotates 180° to create endless barrier configurations.

Folds to Less than Half its Size

Retracts to 4' x 1' x 8" in seconds. Several can fit into the trunk of a patrol car. Folded legs automatically lock and can serve as a carrying handle.

Configure your Retractable-Cade's design to meet general or specific applications:

Retractable-Cade Sign Inserts

Printed sign panels allow the Retractable-Cade to be used for multiple applications. Up to three sign inserts slide and lock into each track, storing six signs in one unit.

Stock:

Non-Stock:

Custom:

Signs are single-sided and digitally rear-printed on PETG with white vinyl backing to protect the message. Choose from the messages shown or any custom printing.

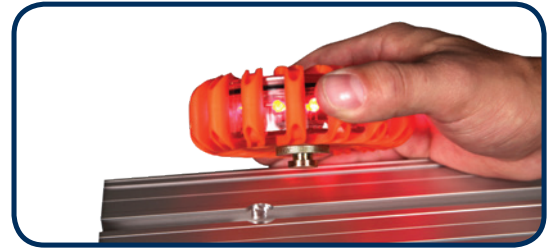

Retractable-Cade Light Kits

Attention-grabbing LED lights slide into the top of the Retractable-Cade for increased visibility day or night.

Features include:

- Hard carrying case conveniently charges and stores six LED lights*
- Each light includes nine patterns (flashing, steady-on, rotating, etc.)
- Lights are waterproof and impact-resistant
- Lights can be removed from magnetic Retractable-Cade adapters and used for other applications like road 'flares'

* Kit includes six rechargeable LED lights, six magnetic adapters, wall charger, car charger, and hard carrying case

Three Standard Extension Colors

Other Options

Reflective decals: 1/2" stripes provide increased visibility at nighttime.

Property ID tagging: text beneath the unit indicates ownership.

RETRACTA-CADE®

BY VISIONTRON CORP

SAFETY ON DEMAND

The fully retractable, portable barricade system.

THE FIRST QUICK DEPLOYMENT BARRICADE

The Retractable-Cade® folds to less than half its size.

Each unit retracts to 4' x 1' x 8" in seconds. Compact size fits into the trunk of a patrol car.

Legs deploy easily with a simple hand lever and lock into place. Folded legs automatically lock and can serve as a carrying handle.

Adjustable length extends from 4' to 10'.

Heavy duty but transportable at 37lbs. it's light enough for one person to carry, but substantial enough for a safe, controlled barrier system.

Rust proof anodized aluminum and extremely durable HDPE extensions designed to withstand heavy use and the outdoor elements.

Light kits, stock and custom insert panels and additional options available for customized configuration.

Lockable connection: secure multiple units together in any configuration.
